

Figure 1 illustrates the experimental design, showing three conditions: Control, Choice, and No-choice. The Control condition is represented by a blue shape, while the Choice and No-choice conditions are represented by orange shapes. Each shape contains several colored dots (blue for Control, orange for Choice and No-choice) connected by lines, indicating the movement of the stimulus. A vertical blue line with error bars is shown in the Control condition, and two vertical orange lines with error bars are shown in the Choice and No-choice conditions. The x-axis is labeled 'Condition'.
